Frequency Response

The C90-6-078 is a 5 inch midrange driver with ultra hard ceramic dome. The high resonant output of the ceramic dome provide for damping of the 5 kHz dome resonance.

A PEPTIME overhung motor design with 38 mm aluminium voice coil former guarantees low energy storage and excellent heat transfer.

The low loss fabric surround and a thin fabric spider center the moving parts with high linearity.

As a typical home stereo midrange driver, we recommend our C90-6-078 for an application from 200 Hz – 5000 Hz.
